

**Energy taxes 2000**

**euro**  **gas**

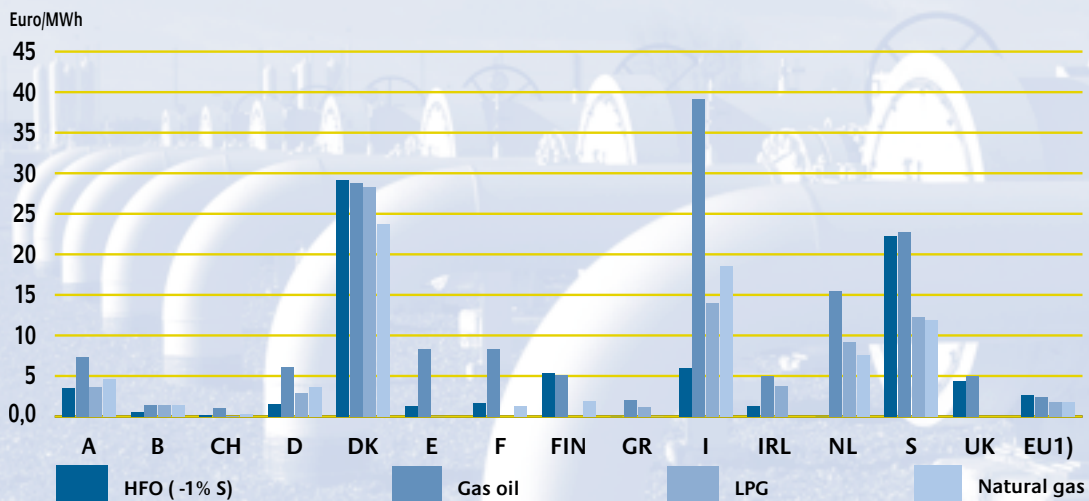

## ENERGY TAXES

In these tables a comparison between taxation levels of competing sources of energy is given (at 1.1.2000). All types of energy taxes (directly levied on the energy sold/consumed) are covered, regardless of their labels and professed objectives, except taxes on motor fuel.

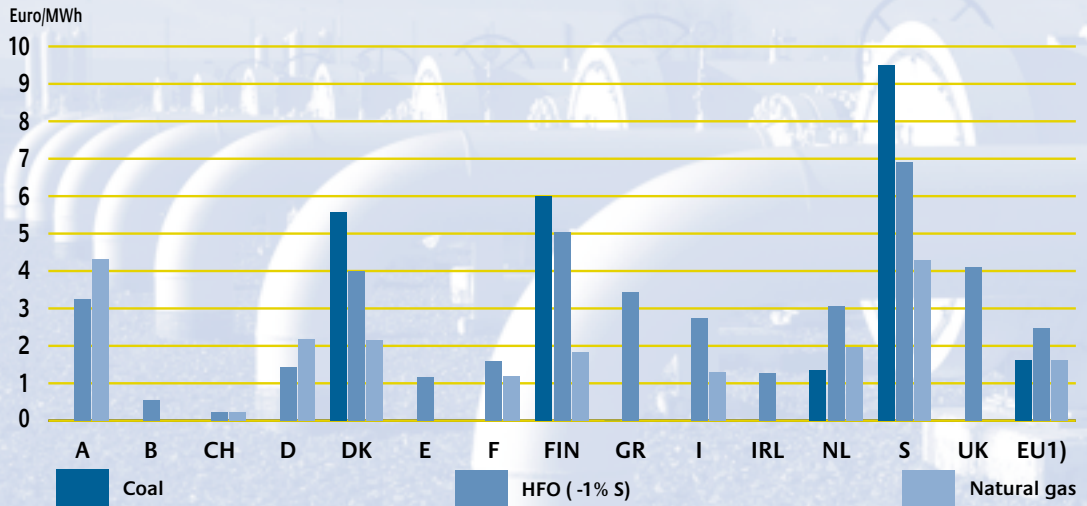

### Residential sector

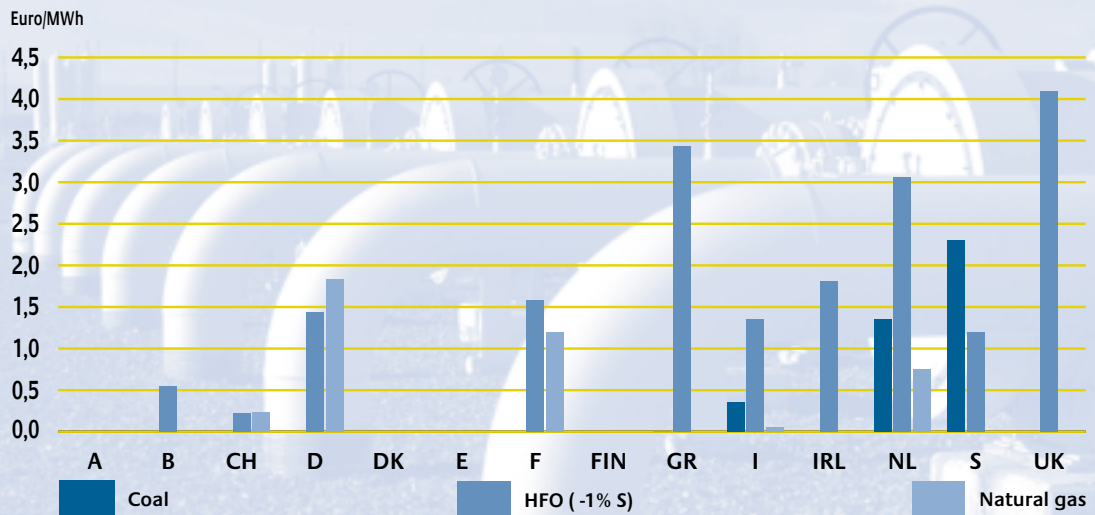

### Commercial sector

### Industrial sector

### Power generation sector

1) The values shown for EU are those proposed by the European Commission in its proposal for a Council Directive (COM (97)0030) as for 1.1.2000
