

Energy taxes 2001

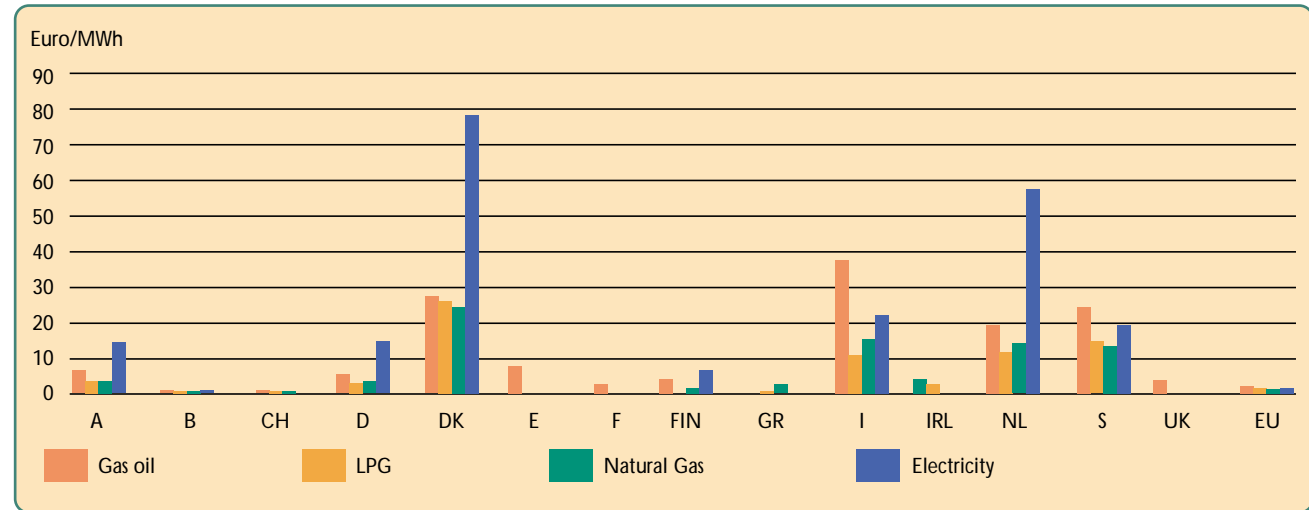

euro  gas

Energy taxes

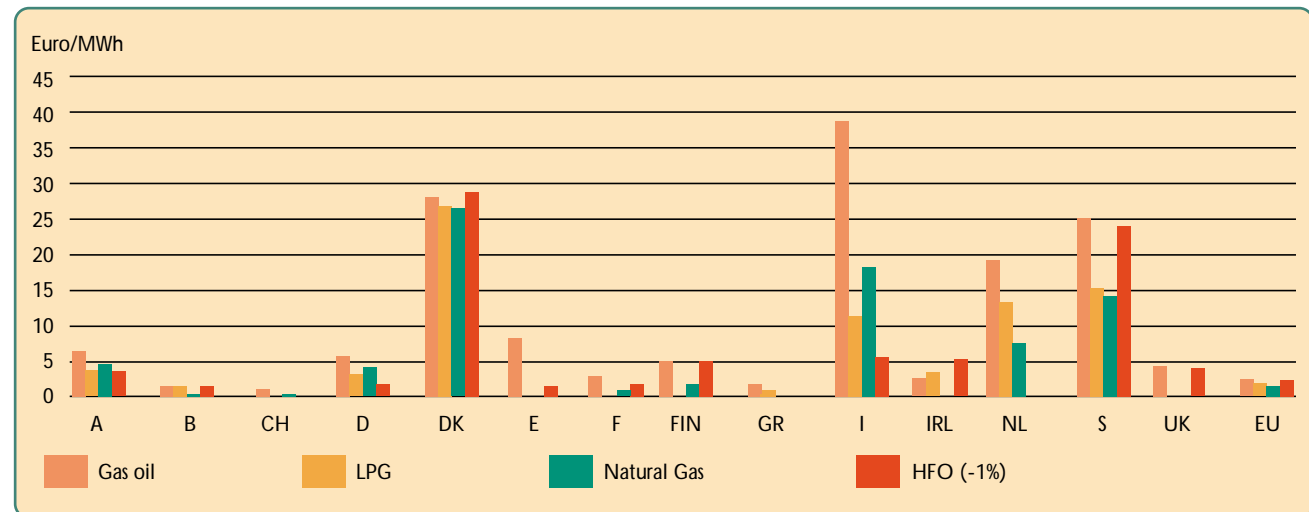

In these tables a comparison between taxation levels of competing sources of energy is given (at 1.1.2001)
 All types of energy taxes (directly levied on the energy sold/consumed) are covered, regardless of their labels and professed objectives, except taxes on motor fuel.

Residential sector

Note: The values shown for EU are those proposed by the European Commission in its proposal for a Council Directive (COM(97)0030)

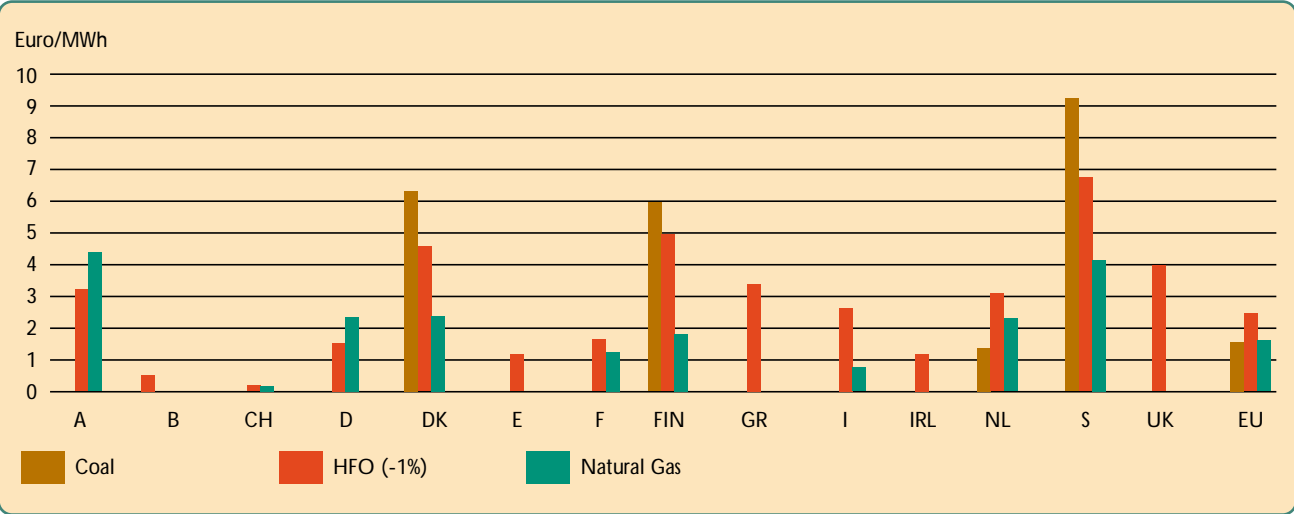

Commercial sector

Energy taxes

Industrial sector
