

The European Union of the Natural Gas Industry

## **PRESS RELEASE**

### **EUROGAS INTRODUCES NEW LOGO WITH NEW BROCHURE**

Brussels, June 1999.

In its new brochure "Natural Gas, Energy for the 21<sup>st</sup> Century (copy enclosed), Eurogas - The European Union of the Natural Gas Industry - highlights the qualities and many advantages of natural gas which make it the fuel of choice into the twenty first century.

Not least of these advantages is the potential of natural gas to contribute to the objectives of an improved environment and sustainable development. Its chemical composition, its ease and efficiency of use will ensure natural gas, especially when it displaces other fossil fuels, continues to make a substantial contribution to the reduction of CO<sub>2</sub>, also to improved air quality.

With the publication of this brochure Eurogas takes the opportunity to introduce its new logo, which combines the name with the dynamic image of a flower, the petals of which appear to merge into the flames of a gas burner.

The logo symbolises the environmental qualities of natural gas, at the same time recalling the familiar blue flame which will meet a steadily growing share of Europe's energy needs.

Eurogas is the European Union of the Natural Gas Industry. In 1998, the member companies of Eurogas employed about 150.000 persons, and supplied over 200 million individual consumers.
