Join Eurogas today as we accelerate the transition to climate neutrality, optimising the use of gases through dialogue and advocacy.
We are an association of **70 companies and associations across 24 countries**, spanning the entire length of the gas value chain.

Our members cover wholesale and retail gas markets, and the distribution of **natural gas, biomethane and hydrogen**. We also work with companies active on gases for vehicles, and on value chain methane emissions management.

Eurogas accelerates the **transition to climate neutrality** through dialogue and advocacy on optimising the use of gases.
Our values

- Science and evidence-based dialogue with, and respect for, the voices of all climate and energy stakeholders.
- A 'Just Transition' through a credible pathway to EU 2030 and 2050 targets.
- Diversity and inclusion in the energy sector.
Eurogas engages with EU decision makers
Eurogas engages in EU policy making

- Monitoring and analysis of legislative developments in the European Union
- Effective advocacy through direct engagement and coalition building
Eurogas gives members visibility
Incisive publications. Informative events.

Gas: CUTTING EMISSIONS AND POLLUTION IN MARITIME TRANSPORT

Introduction
1. LNG, biofuels, biofuels, and ammonia are all key elements in future maritime transport.
2. LNG is ready available and delivers important air quality benefits, with deep reductions in sulfur emissions.
3. Biofuels and biofuels have a key role to play as part of the climate action.
4. Ammonia as an energy carrier has potential for decarbonization.

Euregas key policy recommendations
1. The EU should accelerate the introduction of new emission reduction technologies.
2. Europe’s energy transition needs to be advanced.
3. The EU must integrate the latest research and innovation.

2.3 MILLION JOBS

Our Euregas study has shown how optimising the role of gas in the transition can increase EU employment by 2030.

As industries and the broader economy come through this challenging period, we remain committed to a just transition and quality employment in Europe. To achieve this, continued analysis, social dialogue, planning and investment are needed.

A Just Transition for the gas sector: inclusive, future proof, flexible

Inclusive
In the run up to 2030, the EU Year of Skills, Europe has been working with experts, industry leaders, and transport consultants to advance a Just Transition. The transition in the gas sector is vital for climate objectives, and for jobs, now and season jobs. We want to see Europe lead in new gas technologies and make the most of this opportunity for Europe.

This Just Transition is a core objective of the Paris Agreement, and was defined by the International Labour Organization (ILO) in its Just Transition Guidelines in 2019. We align with the ILO’s vision as:

1. Mainstreaming sustainability across sectors, focusing on local businesses and diversification of activities and using regulations, financial and fiscal incentives.
2. Developing solidarity mechanisms to support the sectors and regions most affected by the transition, including adequate social protection and training programmes for affected workers.

Future proof
Shaping a sustainable energy transition has taken an enormous amount of work, and Russia’s invasion of Ukraine has only made it more important for EU to go forward with its ambitious energy transition roadmap. With both climate change and energy security at stake, the EU needs to take action now.

As industries and the broader economy come through this challenging period, we remain committed to a just transition and quality employment in Europe. To achieve this, continued analysis, social dialogue, planning and investment are needed.
Membership (I)

Category I: **companies - full membership**

Companies or undertakings that have a direct link with the gas supply market, that meet all the following conditions:

- their main decision making centre is located in the territory of one of the present or past Member States of the European Union, or in the territory of a past or present Member States of EFTA;
- they support the objectives and activities of Eurogas;
- they engage in a significant manner in the European gas market in one or more of the following activities: supply, trading, distribution and related activities such as storage and LNG;
- they are approved as a Full Member by the Eurogas Board of Directors.

**Membership sub-categories:**

Companies or undertakings that have a direct link with the gas supply market, that meet all the following conditions:

<table>

Membership (II)

Category II: associations - full membership

- Federations and associations at national level which represent the gas industry or part thereof in one of the present or past Member States of the EU or of the EFTA;
- they support the objectives and activities of the Association;
- they must be approved as a Full Member by the Eurogas Board of Directors.

Category II members pay an annual subscription of between EUR 35,000 and EUR 68,000 and each have one vote in the General Assembly.

*Flat fees are applied to companies with a low turnover.*
Membership (III)

Category III: DSOs - full membership

Distribution System Operators (DSOs) may apply for full membership provided that they adhere to Eurogas' policies and decisions on the unbundling regime.

Otherwise, DSOs / distribution members can pay a reduced fee to participate in the Eurogas Distribution Committee. Such members pay an minimum annual subscription of EUR 7,500, and do not have the right to vote at the General Assembly.
Category IV: associate membership

Associate Membership is open to (a) companies and associations engaged solely in distribution activities and which support the objectives of Eurogas and which are approved as an Associate Member by the Board of Directors.

Associate Membership is also open to (b) associations, companies and federations which do not fulfil the conditions to become a Full Member but which are in other ways direct participants of the gas value chain, and which support the objectives of the Eurogas and which are approved as an Associate Member by the Board of Directors.

Associate Members pay an annual subscription of EUR 5,000 and do not have the right to vote in the General Assembly.
Membership (V)

Category V: **associate membership for non-EEA/UK organisations**

Associate Membership for non-EEA/UK organisations is open to all the entities covered by Category IV that are not based in the European Economic Area or the United Kingdom, and which are approved as an Associate Member by the Eurogas Board of Directors.

Associate Members from non-EEA/UK countries pay an annual subscription of EUR **15,000** and do not have the right to vote in the General Assembly.
